

# CLEO SOLO EPS

Transform the way you prescribe in Secondary Care Outpatient settings.

## Instant, Seamless and Secure Electronic Prescribing.

CLEO SOLO EPS is an electronic prescribing solution which enables quick, seamless, clinically safe prescribing, achieving accreditation from NHS Digital in 2022. It can be used in a wide range of Secondary Care Outpatient and Community settings, enabling patients' prescriptions to be entered and sent electronically to a nominated community pharmacy of a patient's choice.

### Key Benefits.

- **296 tons of carbon saved annually** by avoiding travel for FP10 deliveries
- **Eliminates 100%** of lost, stolen, or illegible FP10's
- **165 hours saved per clinician per year** by not producing handwritten prescriptions
- **Enhanced prescriber supervision**, prescription traceability and audit
- **Cut costs** on stationary, admin, and postage – saving thousands annually
- **Sustainable:** Reduces paper waste and supports a greener future
- **Flexible prescribing:** In an emergency, out of hours, including evenings and weekends

“A million times quicker and easier than paper prescriptions. No lost prescriptions, no lost paper trail.”

“The EPS system is very easy to use and navigate, and it's a safe way of prescribing. It has freed up my time – and that's priceless.”

## Key Features.

Developed with cutting-edge FHIR messaging standards, CLEO SOLO EPS enables instant prescribing with seamless spine integration in Secondary Care Outpatient settings.

Clinicians can get started with just a 5-minute instruction video.

## Enhanced Features.

- Delivers data-rich reporting and prescribing insights
- Intuitive and easy to use UI
- SMS notifications of prescription ID and collection location
- Supports remote consultations
- Supports all prescriber roles in an outpatient setting
- Robust patient search functionality, minimising medication errors

**We focus on innovation and digital transformation because we believe patients should be treated efficiently and effectively in any setting.**

CLEO Systems empowers clinicians with refreshingly intuitive systems designed to reduce costs, save time, improve planning, reporting and budgeting – seamlessly interoperable to reduce unnecessary admin so you can focus on what matters most, **patients, not paperwork.**

In today's fast-paced clinical environments, time and resources are precious. CLEO SOLO EPS simplifies the prescribing process, boosting clinical productivity, enhancing clinical safety and patient satisfaction.

**Future-proof your healthcare setting** with a scalable, innovative solution designed for evolving healthcare demands. By choosing CLEO SOLO EPS, you're investing in a solution that not only benefits your team but also positively impacts your patients and the environment.

The CLEO mission is to work collaboratively in delivering intuitive systems that empower clinicians to provide a better patient experience and improve efficiency across the health economy.

Our team brings 20 years of software experience with ongoing collaboration with a team of NHS Clinicians.

Our vision reflects the NHS's Long Term Plan of making "digitally-enabled primary and outpatient care" mainstream, by bringing technology to the heart of every out-of hospital health provider in the UK.

We're making it happen by creating a product suite that is easy to use, ahead of its time, flexible, safe and delivers clinical and financial efficiencies.

As part of an established UK social enterprise, we care deeply about our environment and the sustainability and quality of UK healthcare, which makes us patient-first, not paper-first.

"It's excellent, and it's not too dramatic to say that CLEO SOLO EPS has changed my working life!"
