

CLEO SOLO EPS

Standalone electronic prescribing to support your healthcare setting.

The screenshot displays the CLEO SOLO EPS software interface. At the top, there's a header with the CLEO systems logo and IC24 logo. Below this, a patient search form is visible on the left, containing fields for Pharmacy Stamp, Age, Title, Forename, Surname & Address, and NHS Number. The main area on the right is titled 'Search Medicine' and shows a list of Fortisip products. Below the list, there are sections for 'Have you checked for Patient Allergies/SCR before prescribing?', 'Prescribed Interactions', 'Indications', 'Contra-Indications', 'Precautions', and 'Warnings'. At the bottom, there's a 'Drug Quantity' and 'Directions for Use' section. The interface is clean and professional, with a green NHS logo watermark in the background.

Selecting drugs to add to your electronic prescription in CLEO SOLO EPS

Developed as a Covid-19 response to enable instant e-prescribing capability, CLEO SOLO EPS gives clinicians instant prescribing capability without the need for any systems integration.

CLEO SOLO EPS is incredibly easy to use. Once the clinical user has authenticated their NHS smartcard and selected the appropriate clinical smartcard role, a patient can be searched for by NHS recognised demographic search criteria or by entering either the EPS prescription ID or case reference from a previously created electronic prescription. This robust method of search functionality means that patient search errors are minimised and the correct medications can be prescribed to the correct patients seamlessly.

A community pharmacy of the patient's choice

CLEO SOLO EPS gives you the flexibility to electronically dispense to a pharmacy of the patient's choice via the NHS Spine without the need for a printed FP10*.

When creating an electronic prescription, the pharmacy search results will display with the pharmacy nearest the patient's required location at the top of the list. Each result will display the pharmacy telephone number to enable you to contact them and check medications are available, as well as the pharmacy address and opening times if required. *If an FP10 is needed, CLEO SOLO EPS supports FP10 printing.

Cost Codes

CLEO SOLO EPS gives you the clarity to be able to track your prescribing costs against specific services, departments or geographical setting. We also support the use of multiple codes specific to your organisation within your product instance. This means that when reporting against EPS activity, this important metric is captured.

The screenshot shows the CLEO SOLO EPS system interface. At the top, there's a header with the CLEO systems logo and a patient ID: KSMITH@ASH-IC24-12345(11111). Below this, a 'Success' message states: 'The prescription has been sent via EPS. Please confirm with the patient that they have the relevant script ID's and pharmacy details.' The main section is titled 'EPS Prescription Items' and contains a table with columns: Drug, CD, QTY, and Dose Desc. The table lists three items: Fortip Bottle (Flavour Not Specified) with CD 'AF' and QTY '1 ml'; Cloxacillin 500mg tablets with CD 'CD-4' and QTY '1 tablet'; and Cloxacillin tablets (Sugar Free) with QTY '1 tablet'. Below the table, it says 'Script Generated Date: 21/09/2020 @ 11:12:48'. There are buttons for 'Return to Patient Search' and 'Sign Out'. Below the table, there's a section for 'EPS Cancelled Items' which says 'There are no cancelled EPS items'. Then, a section for 'Send SMS to patient' shows the patient's returned phone number as 'N/A' and a consent status of 'Consent Given'. Below this, there's a section for 'FP10 Prescription Items' with a table listing 'Aspirin 300mg tablets' with QTY '1 tablet'. At the bottom, there are buttons for 'Prepare New Prescription', 'Cancel', and 'Print FP10'.

Drug	CD	QTY	Dose Desc.
Fortip Bottle (Flavour Not Specified)	AF	1 ml	test prescription
Cloxacillin 500mg tablets	CD-4	1 tablet	test prescription
Cloxacillin tablets (Sugar Free)		1 tablet	test prescription

Drug	CD	QTY	Dose Desc.
Aspirin 300mg tablets		1 tablet	test prescription

SMS Notifications

With patient consent you are able to send confirmation of their prescription ID, which they can use when they collect their prescription at their chosen pharmacy.

If someone is collecting the prescription on the patient's behalf, the patient representative's mobile number should be entered; if the patient is unsure of who the representative will be at the time, you can send the text to the patient, who will be able to forward it as required.

ABOUT CLEO SYSTEMS

CLEO systems provides a new breed of patient management solution. Our team brings 20 years of software experience including collaboration with a team of NHS Clinicians.

This allows us to design user-friendly systems to improve operational efficiency and clinical safety, whilst keeping patients at the heart of your service.

We understand your business

We have a deep-rooted understanding of the ever changing demands of Integrated Care services. This enables us to work with you to ensure our suite of CLEO software products suits your requirements at every stage - call handler, clinician and patient.

Our vision reflects the NHS's Long Term Plan of making "digitally-enabled primary and outpatient care" mainstream, by bringing technology to the heart of every out-of-hospital health provider in the UK. We're making it happen by creating a product suite that is easy to use, ahead of its time, flexible, safe and delivers clinical and financial efficiencies.
